

## ALUTEL MOBILE IS AVAILABLE FOR ANDROID TABLETS AND SMARTPHONES OR WITH IPHONE AND IPAD.

### READER MODE

It allows using your devices as mobile readers which sync information about the cardholders and reads their badges (AWID, HID Prox, HID iCLASS, Indala, MiFare, and more) to create access events with GPS location and event images.

It allows to track the devices to find out where they are (Live Tracking) and where they were (Historical Tracking).

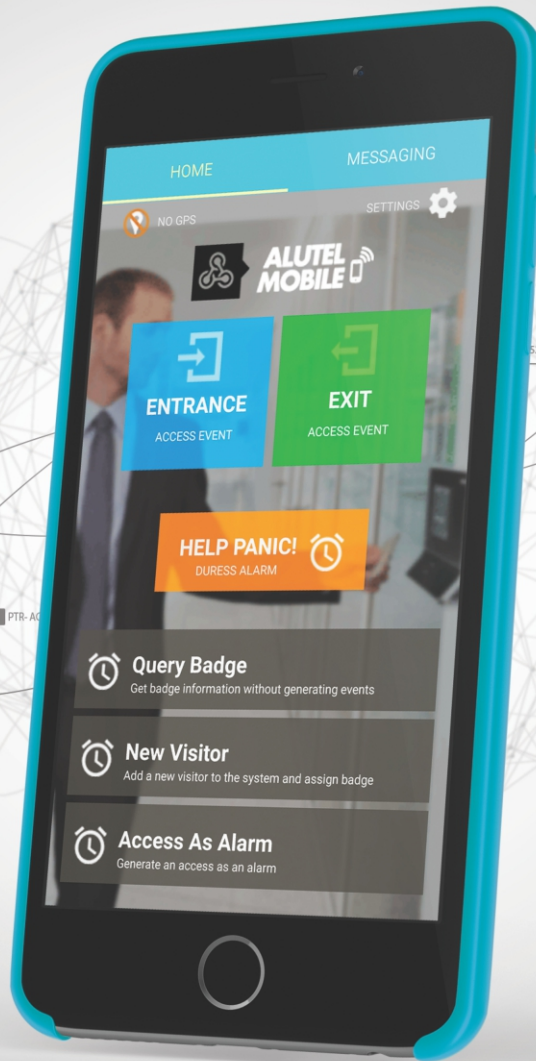

Furthermore, it is fully compatible with geofences (Virtual Gates) which combined it enables you to detect when a mobile reader access any desired zone.

### CELLULAR MODE

Your employee's mobiles and tablets can become their personal access devices.

The mobile user can easily create events anywhere just by tapping a button and optionally they can send event images.

The central monitor shows the access events, displaying in a map the location where the event took place. Mobile tracking, messaging, alarms are available within Alutel Mobile.
